Safety Promotion Project (a brief description):

Children--0 to 14 years old: Renovation of environment facilities in the kindergartens and schools. All the corners in kindergartens are rounded, such as wall, window and so on. Edges of the playing pool are smooth, which are non-slip and anti-falling down. Tiles in children bathrooms are non-slip, the floor in the activity room is soft, the floor of the outdoor playground is covered with the artificial turf and the runway is plastic.

Teenagers--15 to 24 years old: “Plan of Emergency Prevention in Primary and Secondary Schools of Zhongshan District” and “Basic Framework and Elements of Emergency Plan in Schools” are developed; “Fire Emergency Plan”, “Public Emergency Plan in the Campus” and “Emergency Plan for Earthquake Prevention and Disaster Reduction” are improved. Promote interactive education to cultivate students’ safety awareness, improve the emergency response mechanism and regularly conduct emergency drills.

The middle-aged--25 to 64 years old: Constantly promote safety propaganda and education to enhance safety awareness, develop trainings of safety skills and work out safety regulations and operating rules for enterprises.

The elderly--over 65 years old: Establish health records for residents and people of over 65-year-old sign health-care contracts; renovate the environment of domestic places and activity places for the elderly. Improve district roads and install grab bars and non-slip mat in kitchens and bathrooms; organize community voluntary services, integrating with “one to one” event of the party member; form pairs with the lonely elderly and pay regular visits to them and understand their condition; hold a variety of activities that are conducive to the health of the elderly and enrich their spiritual and cultural life.

4. Injury Types and Spot Ambience Involved in Safety Promotion Project:

Domestic places:----Implement the “nail” project and project of the installation of safety doors and alarms to prevent burglaries and violent event. Establish an emergency call system. Regularly hold salons themed with “mental health” for residents and implement the activity of “gas safety into communities and happiness in thousands of families”.

Transportation:----Improve traffic identifications of the traffic network.

----Carry out the activity of “road safety into the community” to promote the popularization of knowledge of traffic safety.

----Clamp down traders’ operating activities by occupying the road so as to keep the traffic unblocked. Set up a “green ribbon” volunteer team to assist the traffic police to keep pedestrians and vehicles obeying the traffic regulations

Profession:----Implement the “6 a” management approach for small premises: to sign a Letter of Responsibility for Safety Goals and a Letter of Safety Commitment, set a (a group of) fire extinguisher, establish dynamic management accounting in the community, develop a self-management system for small business premises, banned the premises with operating activities, storage and living within the same room (“3 in 1” place, for short), and carry out teaching and training activities about the popularization of safety.

School:----Improve the emergency response mechanism and regularly carry out emergency drills: The police station carries out police activities in the campus and establishes the campus police station.

Bring the education of knowledge of safety into the school curriculum and teaching activities.

Organize primary and secondary schools to carry out series of activities about safety education.

Others:----Carry out the quality enhancement project on domestic safety, establish safety training schools for residents based on different communities and print and distribute all kinds of promotional leaflets to residents of the community.

Violence prevention:---Establish Command and Control System and the Technical Monitoring Network System:

Public safety departments equip the defense team, who go on patrol led by the community police, with bicycles. Establish safety volunteer teams which are composed of retired cadres and veteran party members of the community.

Suicide prevention: Strengthen residents' mental health counseling, set up psychological consulting rooms with professional psychologists and regularly organize psychological salons to ease residents' psychological pressure.

Prevention programs for high-risk populations:
Children

“5-Ones” Project for the Elderly

A whistling kettle

A doorbell for safety help

A sign with a gentle reminder

A nonslip mat

Injury Monitoring:

Affiliated Zhongshan Hospital of Dalian University, implements medical monitoring of the 8 community health centers under the jurisdiction.

Medical personnel of primary and secondary schools and kindergartens implement the monitoring.

Traffic Management Department monitors the traffic injuries.

Fire department monitors the fire injuries.

Public safety departments monitor violence incidents and injuries.

Units of production, management and construction under the jurisdiction of Administration Bureau of Safety Working monitor accident injuries in workplaces.

Number of injuries each year: 6749 in 2006, 6476 in 2007, 6266 in 2008, and 5221 in 2009.

Total population: There are 35.76 million in Zhongshan District. Start year of the monitoring: 2006
