

Safety Promotion - An Introduction

”Safety Promotion- An Introduction” is a textbook that describes scientific and theoretical grounds, models, central concepts and basic theories as well as practical experiences of safety promotion.

The book consists of international experiences and examples – from high-income as well as low-income countries. It gives an international perspective on injury and safety promotion, and emphasises the importance of co-operation and inter-sectoral work. It also elucidates the need of exchange of knowledge and experiences between social levels inside nations as well as international.

The book is aimed for safety-promotion practitioners, but also designed to be used as a basic textbook at undergraduate and master level.

146 pages.

2ND revised Edition
