

# WHO Collaborating Centre on Community Safety Promotion

## Indicators for Safe Sports

### Safe Sports in a Safe Community setting have:

1. An infrastructure based on partnership and collaborations, governed by a group of managers, team-members, technical staff and safety professionals that is responsible for safety promotion in their sports arena; The group should be chaired by a Sports Organisation representative with a Team representative as a co-chair;
2. Safe Sports policies developed by the Group and adopted by the Sports Organisation in a Safe Community setting;
3. Long-term, sustainable operational programs covering both genders and all sports arenas, environments, and situations;
4. Programs that target high-risk groups and environments, and programs that promote safety for vulnerable groups;
5. Programs that document the frequency and causes of injuries – both non-intentional (accidents) and intentional (violence and self-inflicted);
6. Evaluation measures to assess their policies, programs, processes and the effects of change;
7. Ongoing participation in Safe Sports networks – at community, national and international levels.

These indicators have been developed by the International Safe Communities movement with the objective of making the world a better and safer place in which to live, work and play.
