## 3. Safety Promotion Program

### 3.1 0-14 Year-Old Children Safety

#### 3.1.1 0-3 Year-Old Children Safety Promotion Program

- **Early-Education Activity Room**

We have set up early-education activity rooms in the kindergartens in the community to receive around the clock 0-3 year-old infants' entrance. Such rooms separately have such functional zones as of self-service games, parent-offspring activity, infant health care, regional operation, preschool education, etc, and we have created a safe activity environment for infants and their parents, for instance, the soft bags on the wall, the sharp angles being dispelled, the slip-resistance treatment of the floor, etc.

- **Safety knowledge Education and Skill Teaching to 0-3 Year-Old Infants' Parents**

Parents lead their infants to participate in safety education activities together, and we tell the parents how to build a safe family environment, allocate applicable home-safety products, and prevent their children's injury at home.

- **Training for Courses of Preventing 0-3 Year-Old Infants from Falling**

We guide infants' parents to pay attention to the matters for the infant's learning to walk, walking and going out, and how to guarantee safety and prevent injury for the infants.

- **Self-Protection Training to 0-3 Year-Old Infants**

We utilize games to let infants know injury-causing factors, like "high", "hot", "Prick hand", "Bite person", "inserting hands " , "wrestling " ,etc.;

- **Simulated Drill for Injury Prevention**

We hold simulated training for the emergency treatment in case of an infant eating foreign matter by mistake. We organize children and their parents to drill for evacuation in case of fire, and train them for coping with strangers.

### **3.1.2. Theme Education on Kindergarten Safety**

**Thematic Lectures on Unexpected Injury:** We instruct parents how to adjust and create a suitable and safe living environment for their children.

**Safety Management Summer Vacation Time:** In summer vacation time, we organize children to launch activities that are of value to the body and mind, and lead them to be far away from an unsafe playground or from an activity that is apt to cause injury.

**Training Teachers for Safety:** We train teachers, health workers and dietitians for safety, with the training contents including methods for dealing with common children's injuries and for handling emergencies.

**Children's Safety Counseling Spot:** We regularly invite experts to listen to inquiries from children's parents, answer their questions about preventing children's injury.

**Classroom Safety Education:** In classrooms, we offer game activities, like "Do not follow a stranger and do not get on a stranger's car", "Serve as a little driver and work as a little traffic policeman", etc. We write children's songs on safety and teach children how to discern injury-causing factors.

### 3.1.3 Theme Education on School Safety

- We have made the "Three Character Primer" on safety which is easy to understand, suits teenagers and is suitable for reading, and hung copies of the primer in each grade and classroom of the middle and primary schools for students to read. We organized students to watch pictures, and exhibitions of paintings on safety knowledge, granted the "School Safety Publicity Manual" to the students, offered lectures on traffic safety, fire prevention, knowledge on fleeing for one's life, etc, organized students to look for hidden dangers in the campus and community and showed the dangers in the form of cartoons, and made common signs for traffic safety into display boards for showing and explaining in the campus.

School Safety Publicity Manual

Three Character Primer on Safety

### 3.1.3 Small Invention for School Safety

The Kongjiang Ercun Primary School organizes students to launch the activity for small invention. They have invented the walking stick that can give out light, humidity-reminding device, ice remover, etc.

We offer mental patients an attendance mode intervening between an organization and a family, carry out medical rehabilitation under the guidance of doctors, and organize the patients for physical training, labor skill training, recreation and the like for their rehabilitation.

### 3.4 . Safety Promotion Program for Senior citizen over the Age of 65:

#### 3.4.1. Old Folks' Home Safety Promotion Program

- We hold various lectures, write and print senior citizen's safety knowledge manuals, and teach senior citizen knowledge, for example, the "Eight Characters" for keeping in good health, one minute for three on getting up, three major taboos for wearing clothes, safety lives, etc.
- The old folks' home wrote and performed programs together with its senior citizen so as to convey knowledge in safety and healthy life.
- We installed handrails in each corridor, implemented floor slip-resistance transformation and installed guardrails on the bedroom windowsills that might be climbed.

Wall Pictures on Safety Knowledge

A Community Doctor's Special-Topic Coaching

#### 3.4.2 Popularizing Muscle-Bone Strengthening Exercise and Bone Rehabilitation Exercise

The community's Health Service Center's doctors guide and popularize the plan for the Muscle-Bone Strengthening Exercise and Bone Rehabilitation Exercise which help improve senior citizen's bodily balancing ability and bone-disease rehabilitation, and set up control groups for monitoring and comparative analysis.

Muscle-Bone Strengthening Exercise

Taijiquan

### 3.4.3. Dispelling Factors Causing Senior citizen's Falling and Injury at Home

We installed stainless steel handrails in the toilets of solitary senior citizens and purely old families, and provided non-slip mats in their kitchens and bathrooms, and granted four-foot walking sticks to senior citizen over the age of 80.

In senior citizen's homes, we installed Ankangtong calling devices to prevent them from getting no prompt help or attendance in case of meeting an emergency but having nobody at their sides to look after them.

Installing handrail in a bathroom and toilet

Granting non-slip mat

Installing Ankangtong calling device free of charge

Granting four-foot walking sticks

#### 3.4.4. "Carefree Silver Hair" Program

The community provided funds to buy unexpected injury insurance for 1,550 senior citizens in the area under its jurisdiction.

#### 3.4.5. "Ten Helps" Activity

We offered more than 1,400 senior citizens in need of help an activity of "ten helps": help have a bath, help clean, help have meals, help see a doctor, help walk, help go to toilet, help have a chat, help be happy, help be quiet and help study .

Seeing a doctor

Helping have a meal

#### 3.4.6. Senior citizen's Day Care Home

We have set up day care homes for senior citizen neglected in the daytime, providing such services as Life Caring, medical care, health consultation, psychological counseling, etc.

Chatting in day care home

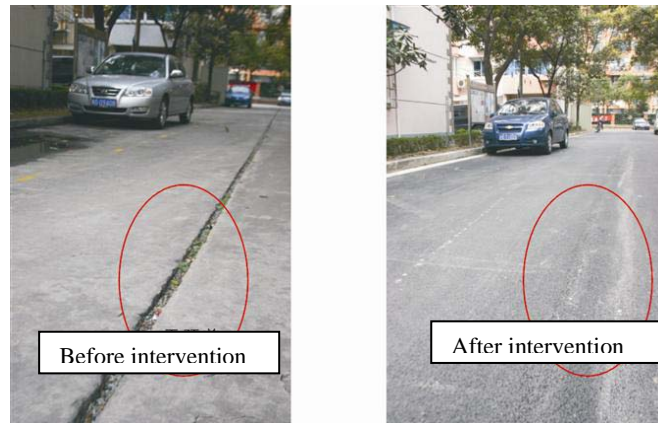

Accompanying seeing doctor

## 4. Injury and Environments Safety Promotion Program

### 4.1. Program for Dispelling Environmental Factors Causing Falling Injury

We installed stair railings in residential buildings of the residential quarters; installed stainless steel handrails on the steps of outdated residential buildings; repaired the rugged and cracked roads in neighborhood.

A neighborhood's road is transformed

Installing stainless steel handrail at an entrance

Handrail in a corridor

### 4.2. Volunteers' Medical Team

The Community Health Service Center's family doctors and some retired medical workers have jointly formed a volunteers' medical team, and relying on the senior citizen's activity rooms, offer touring services to senior citizen, such as measuring blood pressure, medical treatment and health care, health consultation, etc.

### 4.3. Promoting Senior citizen's Psychological Health

#### 4.3.1. Three-Level Work Network for Senior citizen's Psychological

## **Health**

The Community Health Service Center has set up a psychological counseling station, the community has set up psychological guidance workrooms, and part of the neighborhoods have set up psychological consultation work spots, allocating 4 full-time or part-time psychological consultants, launching lectures on senior citizen's psychological health and going to their homes to offer psychological consultation service. In addition, each neighborhood committee has an senior citizen's care working group to help work.

### **4.3.2. Working Mechanism for Senior citizen's Psychological Health**

**Community Health Service Center:** Weekly, the center arranges 2 professional psychological consultants for free counseling and for tracking senior citizen who have a psychological crisis; once every month, from the senior citizen group of the community, the center sorts out those whose psychological disease is serious, sends persons to go to their homes for psychological comfort and treatment; once every three months, the center holds psychological health lectures and launches thematic activities on psychological consultation.

**Community's Psychological Guidance Station:** For two times every week, the station arranges consultation on psychological health; weekly, the station has persons visit senior citizens with more serious psychological disease; once every quarter, the station holds psychological guidance lectures for the psychological working groups of the neighborhood committees.

**Psychological Health Consultation Spot:** For two times every month, psychological consultants carry out senior citizen's psychological guidance.

**Community Volunteers and Care-givers:** They regularly go to senior citizen's homes to have talks with and give guidance to them.

**Neighborhood Committee's Senior citizen's Psychological Working Group:** For the senior citizen with psychological diseases, the group sets up files, does well follow-up-visit records, and implements volunteers' "one-to-one" help. .

### **4.3.3. Setting up Senior citizen's Mood-Adjusting Mechanism**

We hold such activities as the "Health Care Class of Traditional Chinese Medicine", "Book-Reading Group", etc, offer such literature and art courses as of

calligraphy and painting, craft, singing, dance, etc, have set up a traffic safety volunteers' team and a safety volunteers' team, and encourage and organize senior citizen to go out of their homes and move towards the society.

A waist drum team of senior citizen.

A psychological guidance room

#### **4.4. Transforming Environmental Facilities in Kindergartens and Campus**

**4.4.1. Improving Indoor Environment Safety:** We changed the sharp angles of the tables and chairs into round angles or gave protection; laid non-slip mats on the part of the floor which was slippery and apt to result in falling down; put soft bags on the interior walls of the activity rooms; set up danger identification marks at the places of switches and sockets; put warning signs for preventing scalding and electric shock at the boiling water boxes and ammeter boxes.

**4.4.2. Improving School Place Safety:** We laid plastics on the cement playgrounds of the schools, gave safety protection to the outer walls of the school buildings, and laid slip-resistance ceramic tiles on the floor of the dining halls.

**4.4.3. Ensuring Sports Facilities Safety:** We safeguarded the locations of the sports apparatuses that were apt to cause bodily injury, for instance, maintaining and wrapping up with soft sponge, the basketball stands and sports stands, so as to enhance the safety coefficient.

Before and after the basketball stand is wrapped up

Before intervention

After intervention

## 4.5. School Safety Promotion

### 4.5.1. Fire Control Safety Exhibition Hall

The Fire Control Safety Exhibition Hall has such show areas as "Regulations on Fire Control", "Fire-Fighting Equipment", "General Knowledge on Fire Prevention", "Tactics for Fleeing for Your Life", "Fire Control Signs", "Fire Control Model", etc. Here, students can hold educational activities, such as a summer camp, and we arrange safety education courses, or teach student fire control knowledge in the forms of seeing films, cartoons, games, simulated drills, etc.

### 4.5.2. Traffic Safety Experience Hall

The Traffic Safety Experience Hall has such show areas as "Traffic Signs", "Traffic Identifications", "Traffic Knowledge", etc. In the hall, students can run such theme education activities as "Serve as a little traffic policeman once", "Serve as a little envoy once" and "Command little traffic once", and can simulate pedestrians

crossing a road, passing a crossing by bike, and serving as little drivers and little traffic policemen in a miniature traffic scene.

Drilling for Gesture Exercise

## **4.6. Fire Prevention**

### **4.6.1. Setting up Fire Control Publicity Workroom**

In part of the neighborhoods, we have set up fire control publicity workrooms, with fire control police and the neighborhoods' public security directors guiding fire control work. The community has also set up a fire control volunteers' team, which patrols at night, and every night, utilizes electric loudspeakers to remind the community's residents of using fire, electricity and gas safely.

### **4.6.2. Fire Control Education Entering the Community**

We launched the activity of "Get through the life passageway and structure a harmonious building", putting up posters with knowledge on fleeing for one's life and with the "Residents' Fire Control Pact" in the residential buildings.

We held fire control knowledge lectures and placed fire control knowledge display boards, granted the "Fire Control Safety Manual" free of charge to residents, organized residents to watch fire prevention knowledge publicity films and taught residents how to use fire, electricity and gas correctly. In the residential quarters and personnel assembling areas, we organized drills for putting out a fire to save life and property and for fleeing for one's life.

### **4.6.3. Fire Control Publicity Entering Schools**

We have set up the Juvenile Fire Control Police School, have set up the Fire Control Experience Hall, offer educational lessons on fire control, and organize fire control drills and the like during summer vacations. We invite officers and men of the

fire control detachment to the schools for the purpose of teaching fire control knowledge, holding fire control knowledge photo exhibitions, and drilling for fleeing for one's life in case of fire.

#### **4.6.4. Fire Control Publicity Entering Enterprises**

We invite fire control officers and men to enter enterprises for explaining fire control knowledge to their employees, and for organizing them to drill for fleeing for their lives, for saving themselves and for putting out a fire, etc.

High-rise building residents' drill for fleeing for lives

Students' drill for fleeing for lives

#### **4.6.5. Increasing Fire Control Safety Input**

From 2009 to 2010, we provided 20 residential quarters each with a mobile fire engine, placed fire extinguishers and yellow sand barrels in 181 door openings of the residential buildings; installed 1,070 fire-control escape ropes in the residential buildings, checked kitchens' gas utensils and rooms' electric apparatuses and electric wire for the solitary senior citizens free of charge, and installed gas alarms and safety valves for the no-family solitary senior citizens.

#### **4.7. Promoting Occupational Safety**

##### **4.7.1. Enterprises' Safety Credit Rating Assessment**

- We organized social safety assessment organizations to carry out safety credit rating assessment and classification to the enterprises for three times, and divide the safety credit rating degrees of the enterprises into three grades, A, B and C, namely, carrying out comprehensive scoring in accordance with such 7 major aspects as producing and managing in accordance with the law, organizational system guarantee, safety education and training, safeguarding employees' rights and interests, safety business management, place' s primary conditions and accident management and the like and all the items, and carrying out safety supervision in accordance with

the safety credit rating grades, A , B and C.

#### **4.7.2. Establishing Safety Production Information Platform**

The Kongjiang Community Safety Production Information Platform has the basic safety production information involving the enterprises in area under our jurisdiction, the basic information of administrative law enforcement and such functions as internal office automation, etc. We utilize safety production analysis, safety production file management and safety production touring inspection to strengthen supervision and perfect operation specifications so that we have realized dynamic supervision to 854 enterprises. .

#### **4.8. Road Traffic Safety**

- **4.8.1. Optimizing the Traffic Control Environment at Crossings:** We rearranged in an all-round way the traffic facilities, traffic signs and marking lines at all the crossings in the area under our jurisdiction, adjusted the traffic signs and marking lines whose setting was unreasonable and was not striking, adjusted the time ratios of the signal lamps at 4 crossings of Zhoujiazui Road/ Huang Xing Road and s o on, improved the traffic capacity of vehicles at the crossings related with these, repaired the damaged and rugged roads, arranged policemen whose business was overall and whose skills were superior to be on duty at the highway sections whose traffic was heavy, and increased police and assistant traffic administrators at rush hours, realizing the dredging of pedestrians and vehicles during a key period.

#### **4.8.2. Solving the Problem of Motor Vehicle Trailing at Crossings:**

The crossing of Zhoujiazui Road/ Huang Xing Road has 3 rising and falling ring road mouths joining the Inner-Ring Overpass and Yangpu Bridge, and in order to scramble for roads, some drivers would often strive to race against time with the traffic lights, forming the problem of motor vehicle trailing. The improving measures were to strengthen management to the zebra crossing lines and the stop lines for motor vehicles and non-motor vehicles and properly adjust the positions of the stop lines. At a rush hour, police use gestures to command vehicles to pass through, and assistant administrators command at the front, making sure that their whistles do not leave their mouths.

4.8.3. Traffic Volunteers' Team. Civil servants, cadres of the neighborhood committees, community volunteers and the masses jointly participate to intervene in the unsafe behavior at the main crossings in the area.

Volunteers are in action

#### **4.8.4. Civilization Index Evaluation**

We launched the traffic civilization establishing activity which takes renovating "Pedestrians cross roads arbitrarily and non-motor vehicles are ridden arbitrarily" and establishing traffic civilization highway sections as the theme and participated in the activity of traffic-civilization composite index testing and assessing. The crossings of Zhoujiazui Road / Huang Xing Road and of Zhongshan Beier Road /Huang Xing Road listed among the tested and assessed targets for traffic civilization have been among the best for many times in traffic civilization index testing and assessing.

#### **4.9. Community's Road Safety Promotion**

- The property management companies are responsible for registering and checking the neighborhood's motor vehicles. They have set up an information base for the neighborhood's motor vehicles and list vehicle types, car owners' identities, contact ways, etc, into the range of their management.
- We have installed reflectors at the location with dead angles for sight, set up deceleration strips at the neighborhood entrances and exits and at the school gates, installed school warning signs on both sides of the campus, and carried out re-planning and reasonable disposition to the parking spaces for motor vehicles and non-motor vehicles on the neighborhood roads.
- We engaged professional personnel for site inspection and planning vehicle travel routes so as to reduce vehicles going reversely and prevent them from going in the opposite direction.
- At the neighborhood's exit, we have increased non-motor vehicle maintenance service spots, preventing bicycles and mopeds with hidden danger from setting

out on a journey.

Installing Deceleration Strips

Installing Reflectors

Installing Warning Identifications

## 4.10. Home Gas Safety

**4.10.1. Gas-Safety Assistant Administrators' Team:** The sub-district has established a gas-safety assistant administrators' team specializing in the community's gas safety checking, supervision, rectification and improvement, and formulated the "Work Contents and Requirements of the Gas-Safety Assistant Administrators of Kongjiang Road Sub-district" and "Management System for Gas-Safety Assistant Administrators of Kongjiang Road Sub-district", defining the working duties and working disciplines of assistant administrators for gas .

**4.10.2. Setting up a Database of Gas Accidents and Injury:** The assistant administrators for gas safety put in order and analyze the information involving gas accidents and injury, and input it into a database.

## 4.10.3 Launching Gas Safety Inspection

The gas enterprises and the community's gas safety assistant administrators cooperate to take the solitary senior citizen and co-tenants as the focal point for

inspection and carry out gas-safety general survey.

#### 4.11. Disabled Persons' Safety Promotion

**4.11.1 Disabled-Person Helpers' Team.** We set up a 25-people disabled-person helpers' team, offering disabled persons in the community such services as rehabilitation guidance, safety check, demand investigation, etc.

**4.11.2 Setting up Disabled-Person Helping Volunteers' Team.** We set up a disabled-person helping volunteers' team formed by 69 entrepreneurs, university students at school, community's psychological doctors, social enthusiasts, etc, offering the disabled persons in the community such services as health guidance, psychological consultation, etc.

**4.11.3 Construction of Barrier-Free Facilities.** We installed stainless steel handrails free of charge in the toilets of the community's limb-disabled persons, installed barrier-free facilities free of charge for limb-disabled or eyesight-disabled persons, granted auxiliary devices to disabled persons of various kinds, and made 102 heavily-disabled adoptees enjoy at-home care.

## **8. Staff Members for Safe Community Construction:**

### **8.1. Chief**

Name: Dong Yiwen

Post: Director of Kongjiang Road Community

### **8.2. Staff Members**

Total number of the community staff members: 90

Full-time staff members of safety community: 5 persons (The members of the Office of Kongjiang Community Establishing Safe Community)

### **8.3. List of Cross-departmental Leading Group**

The leading group's members total 22 people, who are 12 units, 8 functional departments and public organizations in the area under our jurisdiction, such as

hospitals, public security organs, traffic police, safety supervisors, fire-fighters, property management companies, senior citizen's associations, schools, kindergartens, Early-Education Center, Community Trade Union, Women's Federation, Red Cross, enterprises and institutions, neighborhood committees, safety work experts, community safety volunteers, etc.

Group Leader: Dong Yiwen, Director of Kongjiang Road Community  
Managing Deputy Group Leader: Zuo Zilong, Deputy Director of  
KongjiangRoadCommunity

Deputy Group Leaders: Yu Fang, Deputy Director of Kongjiang Road Community

Sun Longkou, Deputy Director of Kongjiang Road Community

Lu Xiuming, Deputy Director of Kongjiang Road Community

Fang Zhengjun, Director of the Arms Forces Department of Kongjiang Road Sub-district

Wang Zhiju, Director of the Local Police Station of Kongjiang Road

Mi Lingjun, Deputy Captain of Public Security Fire Control

Detachment of Yangpu

#### **8.4. List of Cross-departmental Program Working Group**

We have established 12 work groups involving safety, culture, education, publicity and popularization; accident and injury monitoring; safe community's performance assessment; road traffic safety; fire control safety, community's public security; workplace safety; home safety; school safety; children safety; sports safety; disaster prevention and reduction and environmental safety, etc.

##### **8.4.1. Safe Community's Performance Assessment Group**

The Safe Community's Performance Assessment Group has 10 members, who are from the Yangpu District Center for Disease Prevention and Control, Community Health Service Center, Safety Production and Supervision Inspection Team, Public Security Fire Control Detachment of Yangpu, Traffic Police Detachment of Yangpu Branch of Public Security Bureau, local police stations, etc.

Group Leader: Zuo Zilong, Deputy Director of Kongjiang Road Community

Deputy Group Leaders: Yu Fang, Deputy Director of Kongjiang Road Community

Deng Xiaomin, Director of Kongjiang Community Health Service Center

##### **8.4.2. Elderly People's Safety Promotion Program Group**

The Elderly People's Safety Promotion Program Group has 11 members, who

are from such units as (of) social security, Community Health Service Center, municipal administration, Sub-district's Senior citizen Cause Promotion Association, neighborhood committees, volunteers' organizations, etc.

Group Leader: Tao Wenlan, Director of the Social Security Department of Kongjiang Road Community

Deputy Group Leader: Deng Xiaomin, Director of Kongjiang Community Health Service Center

#### **8.4.3. School Safety Promotion Program Group**

The School Safety Promotion Program Group has 14 members, who are from such units as (of) the Yangpu District Education Bureau, local police stations, traffic police detachment of Yangpu Branch of Public Security Bureau, Yangpu Fire Control Detachment of Public Security Bureau, Kongjiang Ercun Primary School, Huang Xing Middle and Primary Schools, Fengcheng Xincun Primary School, Yangpu Vocational School, etc..

Group Leader: Bian Xianjun, Headmaster of Kongjiang Ercun Primary School

Deputy Group Leader: Li Yawen, Director of Kongjiang Road Community Social Development Department

#### **8.4.4. Fire Control Safety Promotion Program Group**

The Fire Control Safety Promotion Program Group has 10 members, who are from such units as (of) the Public Security Bureau's Yangpu Fire Control Detachment, local police stations, Office for Comprehensive Administration of Social Security, Safety Production Supervision and Inspection Team, neighborhood committees, volunteers' organization, etc.

Group Leader: Mi Lingjun, Deputy Captain of the Public Security Bureau's Yangpu Fire Control Detachment

Deputy Group Leader: Zhang Wexin, Director of the Office for Comprehensive Administration of Social Security of the Kongjiang Road Community

#### **8.4.5. Social Security Safety Promotion Program Group**

The Social Security Safety Promotion Program Group has 7 members, who are from such units as (of) the Office for Comprehensive Administration of Social Public Security of the Sub-district, local police stations, neighborhood committees, etc.

Group Leader: Zhang Weixin, Director of the Office for Comprehensive Administration of Social Public Security of the Kongjiang Road Community

Deputy Group Leader: Xu Hongwei, Deputy Director of Kongjiang Road Local Police Station

#### **8.4.6. Workplace Safety Promotion Program Group**

The Workplace Safety Promotion Program Group has 10 members, who are from such units as (of) safety production supervision and inspection, quality and technical supervision, enterprises in the area under jurisdiction, property management companies, etc.

Group Leader: Wu Mingwei, Team Leader of the Kongjiang Road Community's Safety Production and Supervision and Inspection Team

#### **8.4.7. Traffic Safety Promotion Program Group**

The Traffic Safety Promotion Program Group has 6 members, who are from such units as (of) the Traffic Police Detachment of Yangpu Branch of the Public Security Bureau, the comprehensive administration of social public security, City Management Team, municipal management, etc.

Group Leader: Jin Jian, Director of No. 2 Squadron of the Traffic Police Detachment of Yangpu Branch of the Public Security Bureau

Deputy Group Leader: Zhang Weixin, Director of the Office for Comprehensive Administration of Social Public Security of the Kongjiang Road Community

#### **8.4.8. Disaster Prevention and Reduction and Environmental Safety Promotion Program Group**

The Disaster Prevention and Reduction and Environmental Safety Promotion Program Group has 6 members, who are from such units as (of) municipal administration management, the Administration Bureau of House Property, Urban Administration Bureau, property management companies, etc.

Group Leader: Zhang Yuming, Director of Kongjiang Road Community's Municipal Administration Management Department

Deputy Group Leader: Zheng Yuhua, Leader of No. 6 Detachment for City Management

#### **8.4.9. Children Safety Promotion Program Group**

The Children Safety Promotion Program has 8 members, who are from such units as (of) the Kongjiang Road Community, the Women's Federation, kindergartens, the 0-3 Year-Old Infants' Early-Education Center of Yangpu District, etc.

Group Leader: Li Yawen, Director of Kongjiang Road Community's Social

Development Department

Deputy Group Leader: Li Xiaohong, Director of the Women's Federation of the Kongjiang Road Community

#### **8.4.10. Sports Activity Safety Promotion Program Group**

The Sports Activity Safety Promotion Program has 5 members, who are from such units as (of) the Kongjiang Road Community, sports clubs, neighborhood committees, etc.

Group Leader: Li Yawen, Director of the Kongjiang Road Community's Social Development Department

#### **8.4.11. Home Safety Promotion Program Group**

The Home Safety Promotion Program Group has 8 members, who are from such units as (of) the Kongjiang Road Community, gas companies, Yangpu District Food and Drug Administration, neighborhood committees, etc..

Group Leader: Zhang Yuming, Director of the Kongjiang Road Sub-district's Municipal Administration Management Department

Deputy Group Leaders: Dai Mingyao, Director of the Yangpu Office of the Gas Company

Li Xuedong, Director of the third branch of the Food and Drug Administration

### **9. International Safe Communities Activity and Exchange**

- In February 2011, the group leader of the leading group led a team and went to Wunshan District of Taipei City so as to learn and exchange experience in establishing the safe community.

- In October 2009, director of the Office of Establishing the Safe Community participated in the Fifth Asian Safe Community Conference and National Safe Community Working Conference held in Beijing.

- We have organized for many times the directors of the safety promotion Program groups to go to learn from international safe communities, like Youth Park Sub-district of Shandong's Jinan's Huaiyin District, Shanghai's Pudong New Area's Huamu Sub-district, Jinqiao Town, Shanghai's Luwan District's Huaihaizhong Road Sub-district, Ruijiner Road Sub-district, Shanghai's Putuo District's Changzheng Town, Shanghai's Yangpu District's Xinjiangwancheng Sub-district, Siping Sub-district and Wujiaochang Sub-district.
