Surveillance of injuries

Data registration system based on data gathered from studies done in district, hospitals, emergency, fire brigade, regulatory force office, and accident registration system pilot results are located in district 18. We use these data to make decision and evaluate our programs. Analyzing the data gathered from different organizations show data registry in various organizations and offices have different approaches. The following charts show accident injuries based on data gathered from district studies. These data shows that effective hit, burn, fall, and vehicles have important roles in the mechanisms of accident incidence
